

MSc

People and Robots for Sustainable Work

Co-funded by the
European Union

Global manufacturing Innovation will be led by Europe

EIT Manufacturing's mission is to bring European manufacturing actors together in innovation ecosystems that add unique value to European products, processes and services and inspire the creation of globally competitive and sustainable manufacturing.

The European Institute of Innovation and Technology (EIT) is an EU body created in 2008 to strengthen Europe's ability to innovate. Today it is Europe's largest innovation ecosystem with over 2,000 partners.

The EIT supports the development of dynamic, long-term thematic partnerships (Knowledge and Innovation Communities, EIT KICs) among companies, research and higher education institutions, to face specific societal challenges.

Together with their leading partners across Europe, the EIT Community offers a wide range of innovation and entrepreneurship activities across Europe:

Entrepreneurial education courses, business creation and acceleration services and innovation driven research projects. The EIT Community helps innovators turn their best ideas into cutting-edge products, services and jobs for Europe.

Unique EIT model highlights:

- Provides access to a community that powers innovators through the entire innovation journey, from education to lab to market
- Embraces disruptive and incremental innovation and embeds entrepreneurial education activities in its innovation activities
- Business-oriented with strong focus on financial sustainability
- Delivers a pan-European bnetwork strongly anchored in local innovation ecosystems.

EIT Manufacturing is an Innovation Community within the European Institute of Innovation & Technology (EIT) – that connects the leading manufacturing actors in Europe. Fueled by a strong interdisciplinary and trusted community, we will add unique value to European products, processes, services – and inspire the creation of globally competitive and sustainable manufacturing.

EIT Manufacturing's approach is designed to immediately and forcefully address specific economic and societal challenges, leveraging opportunities to maximise the impact for a successful European manufacturing.

Our vision is that the global manufacturing innovation is led by Europe.

Our mission is to bring manufacturing actors of Europe together in innovation ecosystems that add unique value to European products, processes, services – and inspire creation of globally competitive and sustainable manufacturing.

TABLE OF CONTENTS

GENERAL INFORMATION

Locations: Austria, Spain, Switzerland

Duration: 2 years

Application deadline: 1st March 2022

Language: English

Study Type: Campus

Pace: Full-time

What is this programme about?

People and Robots for Sustainable Work (PR) is a program combining manufacturing science, robotic system physics and control system automation, including the design of customized manufacturing processes and production management.

What are the obtained diplomas?

2 Master's Degrees (issued by the entry and exit universities)

An EIT Label Certificate

Entry University

Goi Eskola Politeknikoa
Faculty of Engineering

University of Applied Sciences and Arts
of Southern Switzerland

SUPSI

Exit University

TECHNISCHE
UNIVERSITÄT
WIEN
Vienna | Austria

PARTNER UNIVERSITIES

**Mondragon
Unibertsitatea**

**Goi Eskola Politeknikoa
Faculty of Engineering**

Mondragon Unibertsitatea is a University of social initiative and social vocation, non-profit making and declared of public interest. Committed since its foundation to quality education and studies with a practical focus, they give great importance to the comprehensive training of their students

University of Applied Sciences and Arts
of Southern Switzerland

SUPSI

The University of Applied Sciences and Arts of Southern Switzerland (SUPSI) is one of the nine professional universities recognised by the Swiss Confederation. Founded under federal law, SUPSI offers more than 30 Bachelor's Degree and Master's Degree courses, characterised by cutting edge education which unites classical theoretical-scientific instruction with a professional orientation. Great care is given to research, carried out in key sectors on competitively acquired projects with large European and national agencies or mandated by organisations and institutions.

**TECHNISCHE
UNIVERSITÄT
WIEN**
Vienna | Austria

The TU Wien is Austria's largest research and educational institution in the field of technology and natural sciences. More than 4,000 scientists are researching "technology for people" in five main research areas at eight faculties. The content of the studies offered is derived from the excellent research. More than 27,000 students in 55 degree programmes benefit from this. As a driver of innovation, TU Wien strengthens the business location, facilitates cooperation and contributes to the prosperity of society.

SYLLABUS*

Type of Modules	Total Credits for EIT Manufacturing Master	Total credits Year 1	Total Credits Year 2
Technical courses	45	40-50	10-20
Specialization courses	15		
Innovation & entrepreneurship courses	30	10-20	10-20
Master Thesis	30	0	30
Total	120	60	60

* The syllabi presented are indications of the classes for the year and may differ

Courses and Learning Outcomes

The courses offered in the programme give a common background at the Entry universities, while the Exit universities are generally more specialised on the Digital Manufacturing Technologies related topics.

Technical core courses

Sustainable Manufacture	This course teaches students methods and tools to assess and improve processes to reduce carbon generation and natural resource use.
Operations and Logistics	This course teaches students how to ensure that the right amount of goods are produced and delivered to the correct recipients according to schedule.
Project Management	This course teaches students how to lead the work of a team to achieve goals and meet success criteria at the specified time.
Manufacturing Processes	This course teaches students the physics of equipment and processes that transform materials into parts into assemblies into systems.
Materials	This course teaches students the mechanics of materials, including finite element analysis.
Mechanical Design	Methods and tools to design parts, components, or products of mechanical nature.
Digitalization of Manufacturing Systems	This course provides the student with understanding and improvement of manufacturing systems to flexibly manufacture products globally.
Statistics and Machine Learning	This course provides the student with understanding of the design and analysis of means to interface between humans and machines.
Quality Management	This course provides the student with understanding of overseeing processes to ensure a level of quality and confidence, including metrology.
Additional University Required Courses	Certain universities have additional degree course requirements, including engineering courses not specifically related to manufacturing. This can include mechanical engineering degree requirements or writing proficiency requirements.

Specialization Courses

Robotic Systems	This course provides the student with knowledge necessary to design, build and maintain industrial robotic systems.
Human Machine Interactions	This course provides the student with understanding of the design and analysis of means to interface between humans and machines.
Control and Automation	This course provides the student with knowledge necessary to design, build and maintain intelligent and automated industrial equipment.
Robotic Systems Project	This course will provide hands on experience developing robotic and automation technology or systems.

ADMISSION

Who can apply to the Master school?

- Students who have a Bachelor of Science Degree of 180 ECTS in a the field related to the track.
- Students in their final year of Bachelor of Science studies may also apply and if qualified, receive a conditional acceptance. They will have to present their degree certificate to the entry university before enrolment, at the latest.
- The specific required admission diplomas are:
B.Sc. degree in Mechanical Engineering, Electrical Engineering, Computer Engineering, Business Engineering, Computer Science, Information Technology or Industrial Engineering or equivalent degree.
- Students Bachelor of Science degree **must** provide the student with basic competence in the following fields: engineering analysis, programming, and mathematics including calculus, algebra, and mathematical statistics.

What are the language requirements of the EITM Master School?

All programmes are thought in English.

Students are requested to provide an English certificate (IELTS, TOEFL, etc.) to prove their English proficiency*

Minimum certificate grade is:

- IELTS ≥ 6.5 , with no section lower than 6

A photocopy of the IELTS test result together with your application documents is sufficient.

- TOEFL ≥ 93 (minimum 21 for writing, 19 in the other sections)

English test results from TOEFL should be sent directly from the ETS test centre to the EIT Manufacturing Master School Office (EIT Manufacturing Master School code number: C898)

- CAE: grades A – C are accepted
- CPE: grades A – C are accepted

*The TOEFL Test can be waived under certain conditions, please refer to the website for more details

FINANCE AND SCHOLARSHIPS

Tuition fees per year:
8,000€ for EU/EFTA candidates
15,000 for non EU/EFTA candidates

Fees include all programme expenses and insurance but do not cover living expenses and local university text books.

How are scholarships awarded?

Scholarships may include: mobility grant, subsistence costs support and fee waivers. Scholarships are awarded to a sub-set of students based on a ranking that considers:

- Academic grades
- Gender
- RIS countries citizenship*
- Study track

All students are eligible for scholarships and they don't need to present any specific request for it. The EIT Manufacturing Master School will rank the students and offer the scholarships at the time of the student admission.

- RIS countries: Bulgaria, Croatia, Cyprus, Czech Republic, Estonia, Greece, Hungary, Italy, Latvia, Lithuania, Malta, Poland, Portugal, Romania, Slovakia, Slovenia, Spain.

A WORD FROM THE EIT MANUFACTURING

Paola FANTINI

Education Director EIT Manufacturing

In the EIT Manufacturing Master programmes, students will gain the capabilities, opportunities and support from the network to become real entrepreneurs and change makers, to pursue the career they want to take. They will learn to question the status-quo, identify challenges and opportunities, mobilize energies, develop and promote innovative solutions. They will become skilled at dialoguing, reasoning and negotiating with peers and other stakeholders, in addition to acquiring excellent technical and business competences.

Lucia RAMUNDO

Master and PhD Program Manager

Our programmes allow students to become experts in innovative manufacturing fields from both from both the technological and business and management side. We develop their leadership, creativity and all soft skills needed to navigate the complex industrial landscape while also taking into account the needs of society.

The Master in People and Robots for Sustainable Work programme is a Master of Science level programme within the EIT Manufacturing Master School. The EITM Master School is a highly prestigious Manufacturing Engineering and Science education provider on an advanced level with a focus on Innovation and Entrepreneurship (I&E). The education at EIT Manufacturing Master School combines technical competence with skills in Innovation and Entrepreneurship. EIT Manufacturing Master School students will be an elite group of forthcoming engineers, operators, innovators, and other relevant professionals.
