Participation of non-member organisations in Call 2022 – Information for existing partners
EIT Manufacturing – Open Call

Process to involve new organisations in proposal

- Organisation checks conditions on Internet – see slide 3
- Organisation fills out “Expression of Interest”
- New organisations can be added to proposals (incl. budget)
- When proposal is selected, new organization needs to become Activity Partner

List of expressions of interest available on EIT Manufacturing Intranet – see slide 4

NOTE:
- Employees of prospective partners will not get access to edit proposals, need to work through existing partners
- Activity Leader to make sure new partner agrees to final proposal submission
EIT Manufacturing – Open Call

How non-partners can participate

EIT Manufacturing invites organisations to participate in its Call for Proposals 2022

**What we do**

EIT Manufacturing is an innovation ecosystem with the mission to bring European manufacturing actors together in order to add unique value to European products, processes, services – and inspire the creation of globally competitive and sustainable manufacturing – see About Us.

We solicit Activity proposals in the areas of education, innovation, and business creation and will co-invest with the partners to achieve economic value and societal impact.

We invite organisations that are currently not members of our association to participate in our Call for Proposals. For details of the current call process, please download the Call for Proposals 2022 Guidelines.

Organisations intending to participate in the call must:

- be able to advance the state of European manufacturing industry and competencies
- be eligible for EU funding according to Horizon Europe rules, e.g. incorporated in Europe or associate

**How to join**

If you want to express your interest to participate, please fill out this form. You will be asked for key information on your organisation, including its general competencies in the manufacturing area and the specific interest in this call.

Note: According to our statutes, the lead partner of an Activity must be an existing member of EIT Manufacturing. This means that you will have to become part of a proposal team with at least one EIT Manufacturing member. You can get in contact with our members via the representative provided in our list of current partners. In addition, the information you provided in the form will be published to our existing partners where they can contact you.

If a proposal you are involved in is selected for execution in 2022, you will have to become a member of the EIT Manufacturing association as an “Activity Partner”. This entails paying a membership fee of €10,000 of the funding from EIT Manufacturing. After 2022, you may apply for a permanent membership.

**Key dates:**

- Pre-Call opens March 01, 2021 – closes March 22, 2021, 23:59 CEST
- Main Call opens March 25, 2021 – closes May 7, 2021, 23:59 CEST
- Proposals acceptance decision announced July 22, 2021
- Proposal revisions completed July 23, 2021
- Start of accepted Activities Jan 1, 2022
