

# CHALLENGE AND SOLUTIONS

The ENHANCE project answers to the increasing need of having adaptive learning paths in manufacturing technologies for professionals and executives, enhancing their technological knowledge in order to improve their decision-making skills.

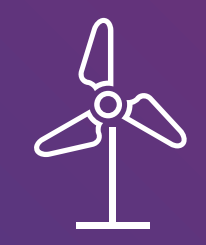

*“Thanks to EIT we were able to share manufacturing technology updates among partners and across Europe”*

## TIMING AND MILESTONES

- Preliminary assessment – May 2021
- Learning Journeys definition – June 2021
- Nuggets development – August-November 2021
- Pilot workshops testing – October-December 2021
- Project closing and final report - December 2021

## MAIN PROJECT RESULTS

- Produce and deliver robotics applications
- Develop 8 adaptive Learning Journeys for Professionals and Executives
- Reach more than 40 opinion leaders coming from companies and institutions involved in manufacturing across Europe
