

PROJECT START

150.000 € EIT Funding

Survey on digitalisation maturity of manufacturing SMEs in RIS countries
May/2021

Technology demonstrators addressing the identified digitalisation challenges
Sept/2021

Pilot hands-on courses & digital learning nuggets
Nov/2021

Main dissemination events
Dec/2021

Networking and further development of established Learning Factories to meet the needs of SME stakeholders
Jan/2022

CHALLENGE

- Many SME struggle to embrace the Industry 4.0 revolution and the uptake of advanced technologies remains a challenge – especially in RIS countries.

SOLUTION

- Retrofit the existing production equipment.
- Develop innovative learning content based on best practices.
- Upskill the personnel to boost the uptake of advanced technologies.

BENEFITS

- Even with no major initial investments, SMEs are able to transform towards next-generation factories with more competitive, smarter and sustainable production.

MAIN PROJECT RESULTS

50+

Manufacturing SMEs involved

6

Learning Factory projects

3

Blended learning courses

“ Thanks to EIT we were able to effectively assist RIS based manufacturing SMEs on their digital transformation journey. ”

MARTIN JUHÁS

Activity Leader

MAIN PRODUCT

FactoRIS project

AIM: Accelerate the digital transformation of manufacturing SMEs in RIS countries
