

percipio<BigData>

What is Percipio?

Percipio offers solutions that help you to navigate through a complex and fast-changing landscape of emerging technologies.

Percipio identifies, organizes and cross-correlates keywords, people, locations and institutions in all fields of research and technology.

With our algorithms, we turn data into insight and search into discovery!

Technology Mapping

Mapping technologies to support strategic decisions based on sound facts.

Prior Art Evaluation

Find out if your invention is really new.

Brainstorming

Enhance creativity sessions by input based on Big Data.

How does Percipio work?

Remaining in your box and searching for new ideas is a difficult task. All you will find are **known knowns**, nothing really new!

Go to Percipio

Choose your package and duration for usage.

Define your CASE(s) and Keywords.

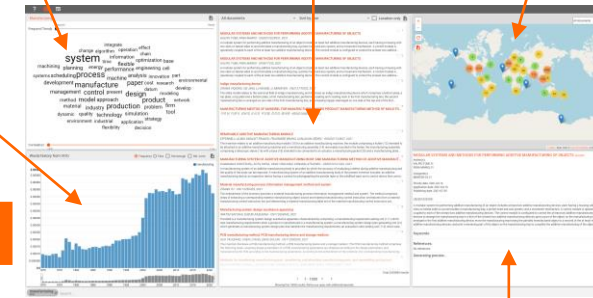

Explore 1.000s of new relevant keywords

Screen and export documents, patents, projects, etc.

Zoom in for geolocation of documents

Compare timelines of keywords

Start your journey and discover real **unknown unknowns!**

Abstracts and details

3-5 working days CASE setup.

Percipio Demo Case: Manufacturing

Your investment:

	3 Months Access	12 Months Access
Individual CASE	400,00 EUR	1.200,00 EUR

Supported by:

Turn your search into discovery!
