## How to

### 1. Research possible use-cases

Making the world smarter, safer and greener we encourage you to think about smart infrastructure, smart homes, smart appliances, security, light systems, multicopters, health and sports as your fields of possible radar applications.

### 2. Prepare your idea

Thoroughly prepare your concept ideas and let us know about it through your application and onepager.

### 3. Apply

Send us your hackathon application and use the registration form to apply. Upon further review, applicants will be accepted at first come, first serve basis. Applications will be accepted until 14 August.

## Timeline

### Application process June-August 2022

Your applications will be accepted from 2 June until 14 August 2022.

### Selection process August 2022

After selection based on the idea proposal sent with your application, we will inform you about your participation by 15 August.

### Hackathon September 2022

The hackathon will be occurring from 14-16 September.
