

PROBLEM/ISSUE ADDRESSED

The EITM master school aims at training leading manufacturing innovators and entrepreneurs offering 5 programmes rooted in the engineering world, but with a focus on innovation & entrepreneurship contents. Learning opportunities focused on these topics are with a strong focus on the learning by doing approach

SOLUTION

The IESMA Summer School has been conceived as a unique international opportunity for students interested in developing innovation & entrepreneurship skills for the manufacturing world. Participants had the opportunity to interact directly with innovation experts and companies, in a stimulating international environment to address real-world industrial challenges.

WHY IT IS IMPORTANT FOR SOCIETY

EITM IESMA Summer School is an opportunity for master students and professionals alike to broaden their network with potential European partners and to boost their abilities and competencies to become entrepreneurs and change makers that will support the realization of a sustainable manufacturing future.

“ *Thanks to EIT we were able to offer EITM master students a unique learning by doing experience on the topics of innovation and entrepreneurship in an international context.* ”

MAIN RESULTS & INSIGHTS

- 41 participants from 12 countries

- 10 industrial challenges on sustainable manufacturing

- Development of a learning path in the Skill.move platform
