

TURING

PROBLEM/ISSUE ADDRESSED

The challenge of labour displacement driven by technological innovation has a long and storied history and is currently a strong challenge for companies' digitalisation.

SOLUTION

TURING programme will contribute to addressing the challenge of digitalisation by promoting personalised and flexible digital enhancement training programmes co-created with digital technology providers, companies adopting those technologies and their mature established customers that use similar technologies.

WHY IT IS IMPORTANT FOR SOCIETY

This programme will contribute to providing:

- Personalized learning with European Certification;
- An individualized approach to supporting the SME's upskilling and reskilling via tailored training and internships programs;
- Co-creation Workshops with the involvement of learners (professionals) in the definition of the learning path;
- Internship to get capabilities on transversal skills and advanced digital technology.

“ Thanks to EIT we were able to carry out an innovative idea to support professionals so that they can see their capacities increased and enriched!

MAIN RESULTS & INSIGHTS

- Synergies between large companies and SMEs

- Sharing experiences and good practices

- Clear and flexible definition of an internship

Co-funded by the European Union

GIL GONÇALVES

Head of DIGIZ lab and Assistant Professor at FEUP
