

PROBLEM/ISSUE ADDRESSED

Material handling in industry faces issues such as working conditions, footprint and efficiency

SOLUTION

Development of a novel Automated Storage and Retrieval System (ASRS) using Automated Mobile Robots which will be able to manage non-standard loads with high efficiency in compact warehouses

WHY IT IS IMPORTANT FOR SOCIETY

This EIT project focuses on an innovative solution which provides higher throughput rates than existing industrial solutions, and reduces drudgery

“ Thanks to EIT we were given the opportunity to collaborate with strategic partners we would’nt have had the chance to work with. ”

MAIN RESULTS & INSIGHTS

-  Accelerate time to market
-  Support R&D investment in order to maintain our competitiveness
-  Connection with high quality partners

**BRICE BRYON**

Global collaborative innovation manager

MAIN PRODUCT

Smart Automation Solutions

AIM: More efficient and sustainable industry
