

EIT Manufacturing RIS Hubs

PROBLEM/ISSUE ADDRESSED

The EIT Manufacturing RIS Hubs are part of the Regional Innovation Scheme (EIT RIS) and were introduced in 2014 to advance the innovation performance of more countries and their regions across Europe, especially countries with moderate or modest innovation scores as defined by the European Innovation Scoreboard.

SOLUTION

EIT Manufacturing, through the hubs, will monitor and facilitate synergies with the Smart Specialisation Strategies and collaborate and built on the outcomes of specific initiative supported by the National/Regional Research and Innovation Strategies for Smart Specialisation.

WHY IT IS IMPORTANT FOR SOCIETY

EIT Manufacturing Hubs will act as an interaction point of representation for EIT Manufacturing in their countries and engage also with neighboring RIS countries where there are no active EIT Manufacturing RIS Hubs. Large portfolio of stakeholders will be informed about EIT Manufacturing and its activities, which will support the visibility of EIT Manufacturing and its activities.

Co-funded by the
European Union

MAIN RESULTS & INSIGHTS

- Organized the RIS Hubs conference with a total of 80 guests with more than 22 nationalities

- Supported more than 10 start-ups in 2021

- Establishment of RIS Hubs in 12 RIS Countries
