

RIS Intrapreneurship Challenge

PROBLEM/ISSUE ADDRESSED

SMEs in EIT RIS regions are frequently reluctant to deploy novel solutions to their shop floor due to the limited availability of financial resources for trying new concepts.

SOLUTION

This program aims to attract, select and support Manufacturing end users in EIT RIS eligible countries to develop innovative projects with the support of solutions providers to make the human operators' work safer, more ergonomic, more environmentally friendly or addressing other societal (and possibly) environmental aspects.

WHY IT IS IMPORTANT FOR SOCIETY

The Intrapreneurship competition will support SMEs in EIT RIS countries, and individuals in their workforce, to deploy innovative solutions for making their work more efficient while improving employee safety and happiness.

Procedure:

- Open call for **Manufacturing end users**, Intrapreneurs and solution providers.
- Selection of max. eight (8) Intrapreneurship challenges.
- Development of the selected Intrapreneurship challenges
- Awarding the Intrapreneurs
