• ICT-Driven		KnowledgeDecision MakingTask	Welding Robotic Cell TestbedDINASORE TestbedxArm7 Testbed	Cognitive AutomationCPS & Digital TwinsCollaborative Robotics

M-NEST-RIS: The EIT role

- Portugal
 INEGI, INESC TEC and FEUP
- Greece
 Laboratory for Manufacturing
 Systems and Automation,
 University of Patras
- Czech Republic Czech Technical University in Prague
- Estonia
 University of Tartu

The **EIT funding** has been crucial for establishing 4 complementary factory units in RIS countries, which are now activated and can be used to implement new distributed TLF projects.

Plus, the **EIT** support enabled the development of some original didactic content that can be further exploited in other EIT educational initiatives.
