

## PLANT-BASED ECO-FRIENDLY SOLUTIONS FOR PLASTIC POLLUTION

[PlasticFri](#) is a GreenTech company from Sweden with the vision to end plastic pollution catastrophe.

Conventional plastics are made from petroleum and stay in the environment for up to 1000 years! By 2050, the oceans could have more plastic than fish. We are on a mission to change that by transforming renewable resources to bio-based products for replacing disposable plastics.

The revolutionary technology is already validated and **certified** by some of the toughest certification standards in Europe as well as receiving Efficient Solution Label from Global Solar Impulse Foundation.

PlasticFri was recently awarded as the **“World’s Most Innovative Sustainability Startup”** among 1400 companies Worldwide!
